

# Perry Central School District

PERRY, NEW YORK 14530

March 14, 2020

PCS Family Members:

The Wyoming County Department of Health (DOH) ordered the closing of its schools to students effective as soon as practicable, and until further notice.

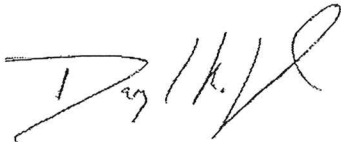

From the inception of this public health matter, the District has implemented efforts to ensure the safety of our entire community. Throughout the extended closure, the District will continue to collaborate with the DOH and regional school districts to implement its plans and utilize the most up-to-date information to make informed decisions.

Select District staff will be designated as essential employees during the closure. The purposes for this action are to maintain operations, implement disinfecting and cleaning protocols, prepare food for students, and continue the functions of the business office.

Our priority during this extended school closure is to ensure the safety of our community. Detailed plans regarding the closure will be communicated and posted in a timely and deliberate manner. Given the constantly evolving nature of this topic, we may be required to adjust our plans. I ask all to consider this when communicating with each other or commenting on the prescribed actions. I have the best team working around the clock on the District's responses.

As I have stated in previous correspondences, the PCS Family is the best because it keeps its head in times like this. I am fortunate to collaborate with the most proactive, and caring staff, faculty, administration, Board of Education, and community. We are united in purpose and will emerge from this public health matter stronger than ever.

Take Care of Each Other,

Daryl McLaughlin  
Superintendent of Schools
